DESTINY LIVING is for individuals who desire more for their lives: more purpose, more passion, more impact, deeper relationships, better health, greater vision or more effectiveness in what they're already doing. It's a program for those who have decided "Good Enough" is no longer good enough.

DOREEN LECHELER, author, consultant and leadership coach, works with individuals and organizations across the country to unleash higher levels of effective performance. In **DESTINY LIVING** she brings research from performance psychology, along with ancient revelation from God's heart to us, to unravel roadblocks and create steps for successful living. She combines the psychology of break-through thinking with the transformational power of faith to create change that is measurable and meaningful.
